

# Utilization Of Launch Application Feature Set in SAP Business One

External .exe File Direct Execute via SAP Business One

## Launch Application:

- In the Present Time of Pandemic Situation We all are Depended on Remote Work Via VPN or Help for AnyDesk or TeamViewer.
- With this Digital World We Often Use Of Anydesk for Supporting from Someone.
- With the Launch Application Feature, We can be Working in SAP Business One and Quickly Access Those key Application at just the Touch of a Button.
- No Need to Go on Desktop or Any Location Run that Application, We can Run from SAP System.
- There are so Many Application we Can Run From SAP like Excel, PowerPoint, WhatsApp, AnyDesk, TeamViewer etc.

## Path + Step:

- Open File Menu or Tool Bar with Launch Application Clicking
- With Click as New , Application Window will Open and as Per Our Requirement We Can Fill Up all the Detail.
- After Fill Up all the Application Detail with Path Location of External .exe File.
- This Is Simple Example Of Launch Application but In System Some of Several Parameter too.
- With Select Click Button as Run which we Wanted among them, .exe file will open it Directly from SAP B1 System
